

PROJECT MANAGEMENT

Megafreight's project management division is a specialised air and ocean offering along with specialised ground handling that allows for turnkey solutions to our clients. Project management is a collective effort encompassing both our internal and local ground handling expertise coupled with the complimentary international experience of our global partners.

The primary role of the Megafreight project management team is to provide freight management solutions spanning traditional, classical out-of-gauge projects right through to complex supply chain scenarios.

Whether it is the relocation of an entire factory or large scale heavy lift or outsize movement of cargo or the movement of sensitive cargo Megafreight is up to the job where our single point of contact and accountability allows customers to experience our 'Service you can Touch' philosophy firsthand.

OUR SERVICE OFFERING INCLUDES THE FOLLOWING:

Heavy Lift and Rigging/Abnormal Cargo:

It is our philosophy to ensure that we partner with 'Best of Breed' suppliers making certain that we offer our clients the very best when it comes to transporting their goods across various modes.

Vessel and Aircraft Chartering:

We will source a vessel or aircraft best suited to carrying your cargo type.

Dedicated Team:

A dedicated project manager means a single point of contact for both communication and billing along with a team of specifically assembled individuals to oversee your project's needs.

Planning, Route Survey and Logistical Feasibility Studies:

Our project management team understands that the success of each project lies not only in a customised solution but in the attention to the details of moving your cargo. Issues such as planning, route surveys and logistical feasibility make all the difference between a successful implementation and a failure.

Global Capability:

Megafreight has a global network of project specialists, in IJS Global and Scan Logistics, ensuring your consignments get the individual attention they require.

Onsite Packing for Specialised Cargoes:

We offer customised packing solutions to suit our clients cargo needs. This means that we take charge from the moment you entrust your shipment to us to ensure that it is handled in the most appropriate manner.

Customs Formalities:

Internal communication with our customs brokerage division ensures that all customs regulations are adhered to. We also take care of "staged consignments" applications and management.

Specialised Cargo:

The specialised cargo division ensures that your shipment is attended to in the most appropriate manner by cargo type, including military cargoes.

Insurance:

Megafreight is a registered provider of insurance – FSP Nr: 17723.
