

RAIL AND ROAD FORWARDING - IMPORT AND EXPORT

Due to the fact that Megafreight is a South African based business, we are in a key position to offer directly controlled, hands-on, cross-border services to both local and international business partners. A complex multimodal offering including rail and road services is part of the Megafreight product solution and is bolstered by the geographical location of the business.

Sub Saharan movement of cargo can be a challenging and costly exercise in terms of customs regulations if the process is not managed professionally. Megafreight's intricate knowledge of these regulations along with their access to facilities allows us to offer customised, cost effective solutions. Whether this is utilising South African or other major African ports.

OUR SERVICE OFFERING INCLUDES THE FOLLOWING:

Cross Border Consolidation Service:

Our hands-on approach to African markets allows us to offer cost effective methods of moving both large and small consignments to our customers.

Order Assembly:

We have the ability to assemble cargo from multiple suppliers for one consignee, thus reducing costs and increasing control.

Hazardous Cargo:

When it comes to hazardous cargo, we have qualified staff who can advise and handle your hazardous consignments as well as arrange packing in terms of the Department of Transport Regulations

Indent Monitoring:

We will proactively manage your purchase order status.

Full Truck Loads:

Our team of professionals will find a solution to your full truck load requirement by ensuring that you get point-to-point transportation on a dedicated vehicle.

Bulk and Palletised Cargo:

Specialised cargoes such as grains, ores, bagged cargo and oversized machinery can be accommodated in various different manners to ensure you get the best possible solution for your need.

Warehousing and Distribution:

Megafreight offers staging, consolidation and inventory management coupled with de-stuffing/stuffing of containers for on-forwarding of goods to final destination.

Distribution Services:

Megafreight is able to offer both general and customised, complex distribution solutions depending on your needs.

In-bond Transit Cargo:

Transportation of cargo under customs bond.

Tracking (GPS):

With our modern, state-of-the-art technical solutions, we offer tracking of vehicles and regular status updates.

Cross Trade:

We understand the freight management of cargo between two foreign points and ensure that while the process from end-to-end is managed effectively, our customer is kept informed of the consignment status on an ongoing basis.

Insurance:

Megafreight is a registered provider of insurance – FSP Nr: 17723.
